

Profit Power: Stronger — or Just Bigger?

Mark Stanley · We Run on EOS® North Texas · September 14, 2026 · The Statler Dallas

Name:

1 · YOUR FIVE NUMBER STORY

Best guess — this isn't a finance test. Use last year's P&L or two numbers from it. This is where clarity begins.

1

Revenue

What you sell

\$

% of rev.

%

2

Directly Variable Costs

Costs that move with revenue

\$

%

3

Gross Profit

Revenue — DVC. The fuel.

\$

%

4

Operating Expenses (OPEX)

The weight. Your nut.

\$

%

5

Net Profit

What's left

\$

%

2 · YOUR PROFIT POWER RATIO™

Gross Profit ÷ OPEX
(numbers 3 and 4)

THIS YEAR

LAST YEAR

Above 1.0 — winning
Around 1.0 — surviving
Below 1.0 — losing

Which way is your number moving?

☐ Rising — stronger ☐ Falling — weaker

Notes:

Profit Power: Stronger — or Just Bigger?

Name:

3 · THE 7 POWER MOVES — THE MATH FOR EACH ONE

Run the math on your numbers — best guess, today's figures. Then rank your top two. Examples use a \$10M business at 50% margin, \$4M OPEX.

#	POWER MOVE	THE MATH · EXAMPLE	WORKSPACE	EST. \$ IMPACT	RANK
1	Increase Price <i>Be bold · fix the leaks</i>	$\Delta \text{ price \%} \times \text{Revenue} = \text{added gross profit (100\% drops through)}$ $1\% \times \$10\text{M} = +\$100,000$		\$	
2	Increase Volume <i>Find the drivers · mine the gold</i>	$\text{Revenue} = \text{Customers} \times \text{Units} \times \text{Price} \text{ — grow one of the three}$ $100 \times 5 \times \$500 \rightarrow 120 \times 6 \times \$550 = +58\%$		\$	
3	Reduce DVC <i>Remove waste</i>	$\text{Revenue} \times \% \text{ waste found} = \text{added gross profit}$ $\$10\text{M} \times 5\% = +\$500,000$		\$	
4	Reduce OPEX <i>Get lean</i>	$\text{OPEX} \times \% \text{ savings} = \text{added net income (and PPR rises)}$ $\$4\text{M} \times 5\% = +\$200,000 \cdot \text{PPR } 1.25 \rightarrow 1.32$		\$	
5	DSO — Collect Faster <i>Days Sales Outstanding</i>	$\text{DSO} = \text{A/R} \div \text{Revenue} \times 365 \cdot \text{days cut} \times (\text{Revenue} \div 365) = \text{cash}$ $\$1.2\text{M} \div \$10\text{M} \times 365 = 43.8 \text{ d} \cdot 5 \text{ d} \times \$27,400 = \$137,000$		\$	
6	DPO — Hold Cash Longer <i>Days Payable Outstanding</i>	$\text{DPO} = \text{A/P} \div \text{COGS} \times 365 \cdot \text{days added} \times (\text{COGS} \div 365) = \text{cash}$ $\$410\text{K} \div \$5\text{M} \times 365 = 29.9 \text{ d} \cdot 5 \text{ d} \times \$13,700 = \$68,500$		\$	
7	DIO — Move Inventory Faster <i>Days of Inventory</i>	$\text{DIO} = \text{Inventory} \div \text{COGS} \times 365 \cdot \text{days cut} \times (\text{COGS} \div 365) = \text{cash}$ $\$820\text{K} \div \$5\text{M} \times 365 = 59.9 \text{ d} \cdot 15 \text{ d} \times \$13,700 = \$205,500$		\$
